

Quality Made in Germany since 1924

Flexible metal working with ARTIFEX

We create perfect surfaces.

Our Series

Our material compositions are as individual as your requirements. The ideal composition of polyurethane or rubber with the corresponding grain guarantees the perfect result. Regardless of whether your process is deburring, brushing, matting, polishing, fine grinding or high gloss finishing: You decide what you need, we have the matching series.

THE ALLROUNDER : SERIES P

A polyurethane bond encloses silicon carbide resulting in a wide range of finishes and applications. For polishing of aluminium available with white fused Aluminium grains.
Colour: SC – P green, EK – P white

THE DURABLE ONE : SERIES Rplus

Regular aluminium oxide embedded in an extremely durable rubber bond ensures outstanding service lives.
Colour: brown

THE AUTOMATIC : SERIES EK - G

White fused Aluminium oxide in a durable polyurethane bonding gives excellent lifespan. Specially designed for automated polishing of molds.
Colour: brown

THE POLISHER : SERIES EK - GP

A mixture of grinding and polishing powders merge with a high volume of pores in a polyurethane bond.
Colour: green

THE FINE ONE : SERIES EK – MFP

Finest white aluminium oxide in a durable fine porous hard foamed polyurethane bond ensures perfect mirror finish
Colour: varies according to grain size

THE SAW : SERIES HZP

Silicon carbide or aluminium oxide in a hard foamed aggressive polyurethane bond give saw blades the final finish.
Colour: varies according to grain size

THE SECIAL ONE : SERIES DA - R

Putting Diamonds in an elastic bond was impossible for a long time. With the series DA – R, polishing of hard metals to a mirror finish becomes possible.
Colour: red

THE ROUNDING : SERIES HDR

Finest Silicon carbide in a specially designed rubber bond allows the rounding of the cutting edge on drills.
Colour: blue

THE EXTRA-HARD ONE : SERIES SC – 5/D

The perfect choice for dressing of metal bonded diamond tools. Silicon carbide in an extreme hard polyurethane bonding give the series D an extraordinary life span.
Colour: grey

THE HANDY ONE : SERIES Z

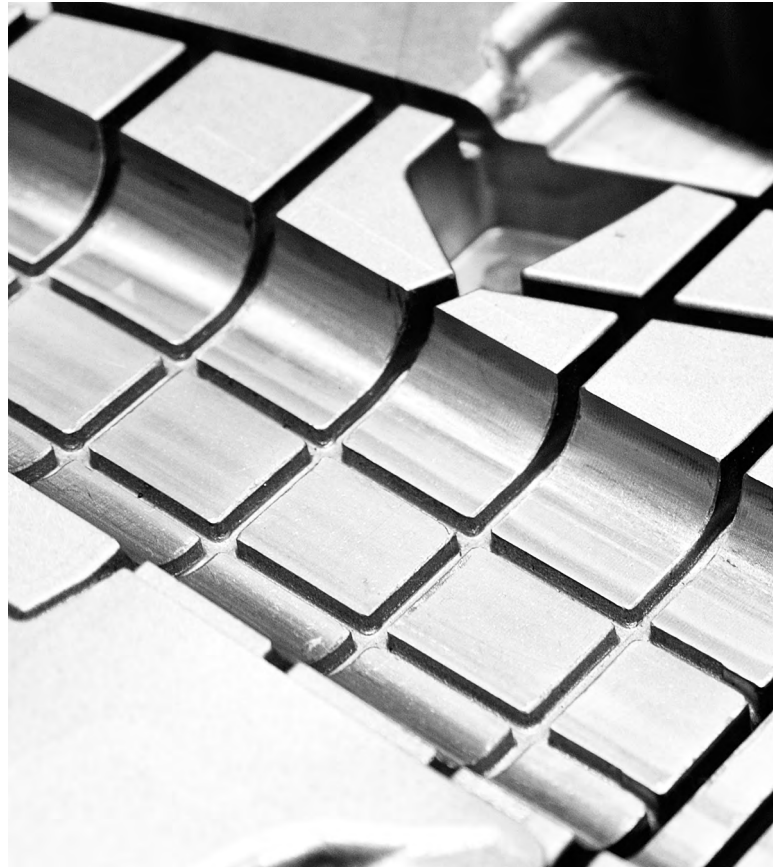

Silicon carbide or white fused aluminium oxide embedded in a foamed polyurethane give smooth hand blocks for a great variety of applications.
Colour: SC – MZ black,
EK – MFZ varies according to grain size

You didn't find the perfect product for your requirement? Please contact us! In our laboratory, we are constantly developing material compositions for the special needs of our customers.

The ARTIFEX-promise

We stand for tools that guarantee the highest quality standards. All ARTIFEX products are “**Made in Germany**” and their above-average service life speaks for itself.

Our Service: You have individual requirements – we offer customised solutions regardless of the material, shape or dimensions. We will gladly advise you on your premises.
